KEN NICHOLAS LATIF

Data Scientist | AI Engineer

Jakarta, Indonesia | kennicholas89@gmail.com | +62 895-3380-66318 | github.com/KenNicholas | linkedin.com/in/kennicholaslatif | portofolio-saya-black-tau.vercel.app

SUMMARY

Undergraduate Computer Science student specializing in Intelligent Systems and Full-Stack AI Integration. Proficient in the complete AI lifecycle, from exploratory data analysis (EDA), data cleaning, feature extraction, and custom model training to building RESTful APIs with FastAPI and developing interactive web applications. Experienced in designing end-to-end data pipelines and deploying containerized models (Docker) for real-world use.

EDUCATION

Bachelor of Science in Computer Science

BINUS University *September 2024 - Present*

- **GPA:** 3.91 / 4.00 | **Expected Graduation:** 2028
- **Relevant Courses:** Machine Learning, Deep Learning, Speech Recognition, Computer Vision, Natural Language Processing, Data Structure, Database Technology, Software Engineering.
- **Publications:** Co-authored a research paper on Comparative Analysis of ResNet50, EfficientNet-B7, and DenseNet121 for Breast Cancer Ultrasound Image Classification - Presented at ICIMTECH 2026 (access here)

ACADEMIC & PERSONAL PROJECTS

Breast Cancer CAD | *React, FastAPI, DenseNet121* | breast-cancer-detect-q59t.vercel.app *2026*

- Designed an end-to-end data pipeline (EDA, data cleaning, CV preprocessing and augmentation) on raw ultrasound images, then custom-trained deep learning models with Grad-CAM (XAI) for interpretable diagnostic.
- Benchmarked multiple deep learning architectures to select the optimal model based on accuracy and efficiency.
- Architected a low-latency RESTful API using FastAPI to serve model predictions and visual diagnostic heatmaps.
- Engineered a responsive React frontend and integrated it with the AI backend, delivering a live, end-to-end CAD platform for user interaction.

AI Text Sentinel | *React, Tailwind, NLP* | fake-spam-review-detect.vercel.app *2026*

- Built a structured text data pipeline: cleaning, tokenization, and feature extraction with NLTK, to train a custom NLP classification engine achieving 92% accuracy in detecting spam/fake reviews.
- Containerized the NLP inference pipeline with Docker and deployed it on Hugging Face Spaces for continuous API availability.
- Built an interactive React/Tailwind frontend that connects seamlessly to the AI backend, enabling users to perform both real-time single-text inputs and batch file analysis

Malicious URL Detect | *FastAPI, Decision Tree, JavaScript* | malicious-url-detection-beta.vercel.app *2026*

- Spearheaded extensive EDA and feature engineering to extract 22 lexical features from raw URL strings, evaluating multiple ML algorithms to select the most optimal low-latency model.
- Trained and fine-tuned a Decision Tree Classifier for low-latency inference, achieving 86% accuracy.
- Integrated the predictive model into an interactive JavaScript web frontend via FastAPI REST APIs for instantaneous threat classifications and confidence scores.

Pantryon | *Flutter, Supabase, Agile* | github.com/Mycticount-X/Pantryon-Mobile *2026*

- Co-developed a Flutter-based mobile application within a 5-member Agile team, designed to reduce household food waste through AI-driven menu recommendations.
- Programmed a smart barcode scanning feature for automated data retrieval with custom error-handling UI for seamless user onboarding.
- Configured and integrated a Supabase backend database, authoring technical documentation and API schemas to streamline team Git workflows and collaboration.

SKILLS

Programming Languages	Python, Java, C, JavaScript, Dart, SQL, HTML/CSS
Frameworks & Libraries	FastAPI, React, Tailwind, Flutter, Scikit-learn, Pandas, NumPy, NLTK, TensorFlow/PyTorch
AI & Data	Machine Learning, Deep Learning, Computer Vision, NLP, EDA, Feature Engineering, Data Cleaning, Data Pipeline, Model Deployment, ETL/ELT & Data Warehouse Concepts
Tools & Databases	Docker, Git, Supabase, PowerBI, Hugging Face, Kaggle, Google Cloud SQL, Microsoft 365
Spoken Languages	Indonesian (Native), English (Proficient), Chinese (Intermediate)

CERTIFICATES

- Microsoft Certified: Azure AI Fundamentals | Microsoft | Mar 2026
- Application Development: Pantryon Mobile App | SOCS S-Class, BINUS University | Jul 2026
- Paper Author: ICIMTech 2026 | BINUS University | Aug 2026
