

KEN NICHOLAS LATIF

Data Scientist | Machine Learning Engineer

Jakarta, Indonesia | kennicholas89@gmail.com | +62 895-3380-66318 | github.com/KenNicholas | [linkedin.com/in/kennicholaslatif](https://www.linkedin.com/in/kennicholaslatif) | portofolio-saya-black-tau.vercel.app

SUMMARY

Undergraduate Computer Science student specializing in Intelligent Systems and Software Development. Experienced in building interactive, responsive web applications and connecting them to reliable backend infrastructure. Motivated on bridging the gap between complex machine learning models and lightweight web applications to build practical solutions that simplify everyday tasks.

ACADEMIC & PERSONAL PROJECTS

- Breast Cancer CAD** | *React, FastAPI, DenseNet121* | breast-cancer-detect-q59t.vercel.app 2026
 - Built a full-stack web app to classify breast cancer ultrasound images as Normal, Benign, or Malignant.
 - Deployed a DenseNet121 model with Grad-CAM (XAI) heatmaps for transparent medical diagnostics.
 - Optimized computer vision preprocessing pipelines, including contrast adjustment and dynamic resizing, to enhance real-world model inference speed and predictive accuracy.
- AI Text Sentinel** | *React, Tailwind, NLP* | fake-spam-review-detect.vercel.app 2026
 - Developed a real-time NLP classification system for spam and fake review, achieving 92% accuracy.
 - Built a responsive React/Tailwind frontend, integrated with a Dockerized FastAPI backend on Hugging Face Spaces for real-time web inference.
 - Automated text preprocessing pipelines using NLTK to support manual inputs and batch file analysis.
- Malicious URL Detect** | *FastAPI, Decision Tree, JavaScript* | malicious-url-detection-beta.vercel.app 2026
 - Built a real-time cybersecurity web app utilizing a Decision Tree Classifier and 22 extracted lexical features to detect phishing, malware, and defacement URLs.
 - Conducted extensive EDA and data preprocessing to evaluate multiple machine learning models.
 - Integrate the machine learning model with an interactive interfacace
- Pantryon** | *Flutter, Supabase, Agile* | github.com/Mycticount-X/Pantryon-Mobile 2026
 - Developed an interactive Flutter mobile app in a 5-member Agile team for a pantry tracking app designed to reduce household food waste via smart tracking and AI menu recommendations.
 - Implemented a smart barcode scanner for automated data retrieval and intuitive error-handling UI.
 - Integrated a Supabase backend and authored technical documentation to streamline Git workflows.

EDUCATION

- Bachelor of Science in Computer Science** September 2024 - Present
BINUS University
 - GPA:** 3.91 / 4.00 | Expected Graduation: 2028
 - Relevant Courses:** Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, Data Mining, Database Technology, Software Engineering.
 - Publications:** Co-authored a research paper on Comparative Analysis of ResNet50, EfficientNet-B7, and DenseNet121 for Breast Cancer Ultrasound Image Classification (Under Review)

SKILLS

Programming Languages	Python, Java, C, JavaScript, Dart, SQL, HTML/CSS
Frameworks & Libraries	React (Vite), Tailwind CSS, Flutter, Node.js, FastAPI, Bootstrap
AI & Data	Machine Learning, Deep Learning, Computer Vision, NLP, Hugging Face, Kaggle
Tools & Databases	MySQL, Git, GitHub, VS Code, Figma, XAMPP, Microsoft 365
Spoken Languages	Indonesian (Native), English (Intermediate), Chinese (Basic)

CERTIFICATES

- Microsoft Certified: Azure AI Fundamentals – Microsoft (Mar 2026)
- Application Development: Pantryon Mobile App – BINUS University (Jul 2026)
- Concept of UX in Digital Transformation – BINUS University (Sep 2024)
